

# Type HS 180 electronic

In comparison to the more affordable HS 140, the HS 180 is more powerful and lighter. Equipped with a 180 mm blade as well as a LED operating display, the HS 180 electronic is especially useful for cutting polystyrene hard foam (DIN 4102). It can be used for straight or round U-cuts, for pipe and cable embedding as well as for clean cuts for ceiling or wall panels. Measured cuts on gable or pediments, difficult round cuts (for example electrical outlets) and various cuts on foam pipe insulation can be performed effortlessly. The hot knife is delivered with a practical suspension clip and a wire brush to clean the blade in a protecting plastic case.

The knife can be exchanged with the use of screws quick and easily.

The hand cutter is equipped with a practical hanging construction.

A plastic case protects the cutter during transport.

## SPECIFICATIONS

- ◆ Including 180-mm-blade and plastic case
- ◆ Protective insulation
- ◆ Power cord: 3 m long, Europlug
- ◆ No creation of cutting dust
- ◆ No creation static electricity

## TECHNICAL DATA

- ◆ Cutting length: 180 mm
- ◆ Time to heat: 6-8 seconds
- ◆ Voltage: 230 V - 50 Hz (110 V - 60 Hz)
- ◆ Power: max. 200 W
- ◆ On/Off Usage: 12s On / 48s Off
- ◆ Cutting temperature max. 500 °C
- ◆ Weight: 450 g
- ◆ LED-Operating Indicator

## POSSIBLE CUTS

## PRICES for Dealers (excluding tax)

- ◆ 298.00 Euro (inclusive case)

## PRICES for End User (incl. tax)

- ◆ 354.62 Euro (inclusive case)
